EXPERIENCES

Automation Engineer Internship – IATECH Solutions Inc. (Aug. 2024 - Dec. 2024)

Automation Engineer Apprenticeship – IATECH Solutions Inc. (Dec. 2024 - Jan. 2025)

PROJECTS & CONTRIBUTIONS

Job Tracker – AI-Powered Job Application Manager | Next.js, TypeScript, Tailwind CSS, Prisma, PostgreSQL, NextAuth, Groq [2026]

Live Demo: <https://job-tracker-srhfalcon.vercel.app/>

- Built a full-stack job application tracker with AI-powered tools to streamline job search workflows
- Implemented secure authentication and protected routes using NextAuth.js with JWT sessions
- Designed and developed job management features including CRUD operations, status tracking, filtering, search, and sorting
- Created an interactive dashboard with analytics and data visualization using Recharts
- Developed an activity timeline to track job application status changes over time
- Integrated AI-powered features using Groq (LLaMA 3.3) to generate cover letters, improve resume content, and provide interview preparation
- Built a responsive and user-friendly interface with dark/light mode, toast notifications, and confirmation modals

Cata-Log – Inventory Management System Web App | React, Node.js, Express.js, MongoDB, Tailwind CSS, JWT, Git [2026]

Live Demo: <https://cata-log-app-srhfalcon.vercel.app/>

- Built a full-stack MERN inventory management system with JWT authentication and role-based access control (admin/user)
- Developed a live dashboard with real-time stat cards, low stock alerts, and per-product stock threshold logic
- Implemented product search, category filtering, and pagination via backend query parameters
- Designed a responsive dark UI with skeleton loading states, toast notifications, and a mobile bottom navbar
- Deployed frontend on Vercel and backend on Render with secure environment variable management

What-To-Do – Task Management Web App | MERN Stack, JWT Auth, TypeScript [2026]

Live Demo: <https://srhfalcon-what-to-do-app.vercel.app/>

- Built a full-stack task management app with user authentication using JWT and bcrypt password hashing, and user-scoped data ensuring each user only accesses their own tasks
- Designed a RESTful API with Express and MongoDB, featuring full CRUD operations, priority levels, due dates, and protected routes via custom auth middleware
- Developed a React & TypeScript frontend with global auth state via React Context, Axios interceptor for automatic token attachment, and protected client-side routing
- Implemented UX features including priority filtering, due date sorting, overdue highlighting, delete confirmation, and persistent dark mode
- Deployed frontend on Vercel and backend on Render with environment variable management for security

SkyCast - Weather Web App | React, RESTful API, Git [2026]

Live Demo: <https://skycast-weather-app-srhfalcon.vercel.app/>

- Built a weather app that fetches real-time data from the OpenWeatherMap API
- Implemented features such as unit toggling, recent search history, and animated UI
- Deployed on Vercel with environment variables management for API security

WareFeed – AI-Based Management System (Team Project) [2024-2025]

- Trained an AI model for inventory/warehouse management and developed camera integration code.
- Automated tracking of sack increments/decrements and bounding box detection.
- Implemented email notifications and data reporting for real-time inventory updates.

EDUCATIONAL BACKGROUND

COLLEGE (Dean's Lister & Academic Achiever)

2021 - 2025

Rizal Technological University - Boni Campus

Bachelor of Science in Instrumentation and Control Engineering

SENIOR HIGH SCHOOL (With Honors)

2019 - 2021

Rizal Technological University - Boni Campus

Science, Technology, Engineering, and Mathematics Strand

SKILLS

- **Frontend**

HTML, CSS, JavaScript, TypeScript
React, Next.js
TailwindCSS

- **Backend**

Node.js, Express
RESTful APIs
Prisma

- **Database**

MongoDB
PostgreSQL

- **Authentication**

JWT, NextAuth.js

- **Tools & Development**

Git, GitHub
Postman, Axios
Vercel, Render

- **Others**

Object Detection (Bounding Box)
