PROFESSIONAL SUMMARY

Full-stack web developer with hands-on experience building and deploying applications using the MERN and Next.js stacks, with expertise in TypeScript, PostgreSQL, MongoDB, and REST APIs. Instrumentation and Control Engineering graduate bringing systems-level thinking, structured debugging, and problem-solving skills to software development.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Next.js, TailwindCSS

Backend: Node.js, Express, RESTful APIs, Prisma

Database: PostgreSQL, MongoDB, Mongoose

Auth & Tools: JWT Auth, Nextauth.js, Git/GitHub, Postman, Axios, Vercel, Render

PROJECTS

Task Manager App - Technical Assessment | Vite, React, Express, Node.js, PostgreSQL, Prisma [2026]

Live Demo: <https://task-manager-nu-smoky.vercel.app/> GitHub: <https://github.com/RenAmamiya0411/Task-Manager>

- Built a full-stack task management application with a Vite + React frontend and an Express/Node.js REST API backend, using PostgreSQL (Prisma ORM, hosted on Neon) for data storage
- Implemented task CRUD operations, including a single combined PATCH endpoint for both field edits and completion-status toggling, with server-side re-fetch logic to respect active search/filter state on task creation
- Diagnosed and resolved a Prisma major-version compatibility issue (downgraded v7 to v6), documenting the root cause and fix
- Deployed frontend to Vercel and backend to Render with environment-based configuration

Job Tracker - AI-Powered Job Application Manager | Next.js, TypeScript, Tailwind CSS, Prisma, PostgreSQL, NextAuth, Groq [2026]

Live Demo: <https://job-tracker-srhfalcon.vercel.app/> GitHub: <https://github.com/RenAmamiya0411/Job-Tracker>

- Built a full-stack job application tracker with AI-powered workflow tools
- Implemented secure authentication and protected routes using NextAuth.js and JWT sessions
- Developed job CRUD, filtering, search, sorting, and status tracking, plus an analytics dashboard with activity timeline
- Integrated Groq (LLaMA 3.3) for AI-generated cover letters, resume improvements, and interview preparation

OnBoard - Real-Time Collaborative Kanban Board | MERN, Socket.io, TypeScript, @dnd-kit, TailwindCSS [2026]

Live Demo: <https://on-board-app-srhfalcon.vercel.app/> GitHub: <https://github.com/RenAmamiya0411/OnBoard-App>

- Built a full-stack collaborative kanban board with JWT authentication and protected routes
- Implemented real-time multi-user sync via Socket.io, with drag-and-drop task management and persistent ordering (@dnd-kit)
- Designed RESTful APIs and MongoDB schemas for boards, columns, and tasks

Cata-Log - Inventory Management System | React, Node.js, Express.js, MongoDB, TailwindCSS, JWT [2026]

Live Demo: <https://cata-log-app-srhfalcon.vercel.app/> GitHub: <https://github.com/RenAmamiya0411/Cata-Log-Inventory-Management-System-Web-App>

- Built a full-stack inventory system with JWT auth, role-based access control, and an analytics dashboard with low-stock alerts
- Implemented product search, category filtering, and pagination for scalable inventory browsing

EXPERIENCE

Automation Engineer - Internship & Apprenticeship - IATECH Solutions Inc. (Aug. 2024 - Jan. 2025)

- Converted STL-based PLC logic into Ladder Logic and studied automation fundamentals via RealPars and Siemens TIA Portal - structured, rule-based problem solving directly applicable to writing and debugging application logic

EDUCATION

B.S. Instrumentation and Control Engineering - Dean's Lister & Academic Achiever - Rizal Technological University - Boni Campus (2021 - 2025)

Senior High School, STEM Strand - Graduated With Honors - Rizal Technological University - Boni Campus (2019 - 2021)
